The last number in your house will determine your schedule as shown in the example above. For example, if you start watering at 6:00 PM you will have to be through at 12:00 midnight. High pressure sprinkling irrigation will be placed on odd and even days using the last number of your house address. If irrigation water is not available due to breaks in the system, arrangements can be made to water when repairs are completed by notifying City Hall @ 436-9600. After 5:00 PM call police dispatch at 434-2320.
